New EBMUD Trail Segment Opens for National Trails Day June 4, 2016

A new path is before you: the JOHN BULL LOOP TRAIL. In our continuing efforts to support our trail users, we added a new loop trail located one and a half miles east of the Campo Seco Staging Area. This new segment of trail branches off the Mokelumne Coast to Crest Trail (MCCT) to the northwest at Lawry Flat, winding through beautiful rolling hills above Pardee Reservoir. Pardee View vista point (open now) and the spur trail to the top of John Bull Peak (elevation 1053 feet) which will open later this year, offer spectacular vistas of the surrounding watershed landscape.

The signs and gates are already in along the new loop trail. Check it out and enjoy some fresh terrain. From Campo Seco Staging Area, the round trip is a bit over 7 miles. As always, trail permits are required. No EBMUD staff will be leading or supervising the day, so be prepared with water, sunscreen, and the necessities to make your trip comfortable and rewarding.

Volunteer with Us - Be an MVP (Mokelumne Volunteer Partner)

EBMUD’s Mokelumne Volunteer Program (MVP) invites you to help with projects that protect and enhance land and public-use facilities in Calaveras, Amador and San Joaquin Counties. Volunteers assist in land stewardship and help maintain trails, parks and historic sites while learning about how EBMUD manages and maintains the Mokelumne watershed. Our volunteers tell us time and again what a positive experience it is to spend the day working outdoors on such worthwhile projects.

The MVP provides many ways to participate: Volunteer workdays -- Docent support -- Research

Check it out on the web: www.ebmud.com/recreation
